

Schurz Library News

Volume 14 No. 2
Fall 2002

Always wanted to be on a READ poster?

You'll have your chance this spring, sort of. We'll be asking for volunteers to get their picture taken with a favorite book for a display during National Library Week in April, 2003. Be thinking about that favorite book and what to wear and respond to the photo shoot call during early Spring semester 2003.

Maasai Collection event

An event featuring the Maasai Collection was held on Wednesday, October 16, 2002 at 4:00 p.m. With artifacts donated by Mrs. Helen Ruchti and the late Mr. James Ruchti, the Library and faculty from the School of Education have partnered to assemble Maasai artifacts, books, and accompanying lesson plans for classroom use.

Some additional artifacts are on permanent display on the 5th floor of the Schurz Library in display cases built by John Russo. Mrs. Helen Ruchti spoke briefly about her travels and acquisition of the artifacts, followed by comments by Kwadwo A. Okrah from the Center for Global Education and Marsha L. Heck, IUSB School of Education. Classroom kits were available for viewing and discussion with Drs. Heck and Okrah about possible uses. A reception followed. The event was co-sponsored by the Schurz Library, the School of Education and the Center for Global Education.

Spring event on Amish culture

The Schurz Library will focus its spring event on Amish culture. Steve Nolt, Assistant Professor of History at Goshen College, will speak about the Amish in northern Indiana. Professor Nolt is a graduate of the University of Notre Dame and has numerous publications related to the Amish and Mennonite peoples and their religion. Date and time to be announced.

Inside this issue...

A special insert in this issue focuses on two types of services available in some of our databases that can make life easier for faculty and students: alert services that do research for you, and methods of inserting links to articles in Oncourse or on course webpages.

Electronic Resources News

IUCAT upgrade includes new features

My Account

Available to all IU students, faculty and staff, **My Account** allows users to review a list of materials checked out or on hold and to renew materials online. Your network ID and password guarantee a secure connection. Reserve materials and materials charged on interlibrary loan must still be renewed in person.

New Library Groupings

You may now search all of the libraries on a single campus in one keyword or exact search. Choose from: All Bloomington Libraries, All IUPUI Libraries, and All South Bend Libraries (which includes the Schurz Library and the Learning Resource Center.) You may also search the Bloomington and Indianapolis law libraries or the medical and dental libraries in a single search. You will not be able to search these special groups in a Browse search; select ALL to browse multiple libraries. Call Number searches must still be completed in a single library.

Search for Musical Scores and Sound Recordings Separately

If you search for sound recordings or for musical scores and other printed music, you'll want to try the new feature that allows you to limit a keyword search by these separate formats. To find these limits, go to the Advanced Keyword search screen, type your search terms and scroll down to the Format limit box. Select Musical Scores to limit your search to printed music. Select Sound Recordings to find various types of recordings, both music and non-music.

PsycINFO cited references

PsycINFO has added cited references appearing in journal articles, books, and book chapters to its records. The basis of the cited references feature is a linked list—appended to the abstract record—of all works cited in the primary document, including journal articles, books and book chapters, published conference papers, and more. From that expanded record, users have several options. They can pull up related articles with one click, or they can click to find all the articles in the database that cited the work. With the cited references, researchers can move forward and backward in time to track research using a specific work as a starting point. In addition, researchers will be able to link directly from the reference list to an abstract for many, if not most, of the references.

COMPASS system defunct

COMPASS (Computer Access to Schurz Sources) is no more. What was once a one-stop shopping place for library databases has been replaced by web access via the library homepage. If you at one time loaded a COMPASS folder onto your workstation, please delete it now. If you have technical questions, please contact Feng Shan at 237-4189. To access our current listing of library databases, please visit the library homepage at www.iusb.edu/~libg.

If you have a disability and need assistance, special arrangements can be made to accommodate most needs. Please contact Rosanne Cordell at 237-4209 for assistance.

Interlibrary Loan delivers

Interlibrary Loan now offers a choice of delivery methods for journal article requests. The options are library pick-up, campus mail (faculty/staff only), or the newest option: web delivery. Web delivery of articles allows patrons to view their articles on a secure website, rather than coming to the library to pick up an article. The patron is sent an email notification for each article which includes a web address and a PIN. Each article may be viewed either 5 times or for 30 days, whichever comes first. To use this new service, just check the "web" delivery box on the request form. In order to view the article once it is received, you will need access to the Adobe Acrobat reader. A link is available to download the free reader if it's not installed on your workstation. If you have questions about this service, please contact the Interlibrary Loan office at 237-4433.

EEBO on IUCAT

The Early English Books Online series is being cataloged and included in IUCAT. EEBO is a resource that includes every book published in England, Scotland, Wales, Ireland and the United States between 1475 and 1700. The collection includes literature, music, religious pamphlets, science materials and many other primary sources. The URL in the catalog record links the researcher to an image of the full text of the work. To search for items in this series only, type "Early English Books Online" in the terms box and select the series button. EEBO items will also display in routine searches based on relevant search terms. The collection currently includes about 68,000 records on IUCAT, with more scheduled for addition in late 2002.

E-books are here

The IU Libraries have purchased a limited subscription to NetLibrary's e-books. While the collection is small, an IUCAT search may reveal a few e-books, mostly those available in the public domain. For example, type "Alice in Wonderland" in the terms box and click on title. The first book shown is an e-book. In order to access e-books, you will need to create a personal account. As part of your account access, you can bookmark pages in your book, or annotate important passages for research. You can also create a *My Favorites* page for easy access to important works. When the due date for an e-book is reached, the book is automatically removed from your account.

Bibliographical software available

Thanks to a three-year site license funded by UITS and the IU Libraries, students, faculty, and staff can use EndNote, ProCite or Reference Manager to maintain databases of references and citations and to create bibliographies instantly. The software is available for free online on IUWare at <http://iuware.indiana.edu/>. You must be connected to the web through an IU connection in order to successfully download the software. For more information, including help and training, see <http://www.bibsoft.indiana.edu/>.

JSTOR collections added

The Schurz Library recently added four new JSTOR collections, bringing our access to five of the six JSTOR collections: Arts & Sciences I, Arts & Science II, General Science, Ecology & Botany, and Business. While JSTOR is primarily a backfile journal database, they have recently developed a partnership with Project Muse to provide access to more recent content in those journals common to both databases. The Schurz Library subscribes to three of the Project Muse electronic journals: ELH: English Literary History, MFS: Modern Fiction Studies, and MLN: Modern Language Notes.

FRANKLIN D. SCHURZ LIBRARY INDIANA UNIVERSITY SOUTH BEND

Volume 14 No. 2
Fall 2002
Nancy W. Colborn, Editor
www.iusb.edu/~libg

Gould gives Gift

Evelyn Gould of Plainview, NY, recently donated hundreds of boxes of books from the estate of her late husband, Eugene E. Gould, M. D. Subjects included in this generous gift include art and art history, history (ancient, military, political, American), biographies, philosophy, theatre, film history, literary interpretation, children's books and foreign language texts in Greek, Dutch, Romanian, Finnish, Turkish, Swedish, German, Russian, Hebrew, Japanese, French, Spanish, and Latin. While this gift will take some time to process, we look forward to these books appearing in our catalog.

Remember:

Full-time Faculty at IUSB can acquire a borrower's card at the University of Notre Dame Libraries. Please call the Schurz Library Administrative Office at 237-4449 to request a card that identifies you to ND as eligible for their library card.

New IUSB Identification cards now include a library barcode on the back. If you have a new ID, please present it at the Library Circulation Desk to have your account transferred to the new account number.

Staff News

Nancy Wootton Colborn has assumed her new duties as Reference Librarian and Coordinator of Library Instruction and Staff Development. For the last four years, she has served as Reference Librarian and Coordinator of Public Relations.

James Lowe is the new Assistant Supervisor of the Learning Resource Center. James is a recent graduate of IU Bloomington and also does web consulting work.

LaKrisha Perry is the new Government Publications Specialist. Lakrisha was born and raised in South Bend, is married and has two daughters, ages 1 and 5. Her previous job was at Holladay Properties as an office assistant and receptionist.

Carla Reierson is the new Library Serials Specialist. A native of Pennsylvania, she and her husband most recently relocated from South Dakota, where she had served as an Associate Pastor in a Lutheran Church. Her husband, Mitch, is the Park Manager of Mini-Mountain Campground in New Carlisle.

Feng Shan is now the Reference Librarian and Head of Electronic Services. Prior to accepting this position, Feng was Web Developer and Database Administrator at Patrick Industries and had previously worked at IUSB as Head of Library Computer Applications.

Food for Fines

The Schurz Library will again support the Art Franklin Memorial this holiday season by accepting food in lieu of fines. During the 1st two weeks of December, join us in collecting food for the hungry.

Funding for INSPIRE gone

Funding from the state legislature for the Inspire project is gone. INCOLSA (Indiana Cooperative Library Services Authority), the state library network, is committed to finding funds for it in both the short-term (2003) and the long-term, which may involve some commitment from participating libraries. \$1.5 million in funding was previously provided to INCOLSA from the Build Indiana fund to purchase and administer the group of EBSCOhost databases and other electronic reference sources that provide access to information for Indiana citizens, students and businesses in their homes, schools and offices. If libraries in Indiana were to purchase these databases on their own, the cost would be more than \$10 million. There are six million residents of Indiana. The \$1.5 million INSPIRE cost equals less than 25 cents -- 1 quarter -- invested per resident per year.

Indiana was the first, and is still the only, state to provide this kind of innovative service directly to ALL its residents -- via the Internet at home and in offices, schools, and libraries. In 2002, Indiana residents performed more than 4.2 million searches on the 26 INSPIRE databases. Access to EBSCOhost for IUSB means access to 26 databases and some electronic reference sources, including approximately 8,000 journals. If we had to pay for access to these databases separately, it would cost the Schurz Library approximately \$35,000/year.

The Indiana Library Federation plans a lobbying campaign for INSPIRE during the Spring of 2003. We will ask for your support in contacting your legislators at that time.

Alert Services: Saving the Time of the Researcher

It certainly comes as no surprise that information is proliferating so quickly that no one can keep pace. Many researchers find it hard to find the time to read through their personal journal subscriptions, let alone browse through all of the ones to which the Library provides access. Fortunately, help is now available.

Most of the Library's online resources have recently begun "alert services." Depending on the resource, you may request that a search on your topic be performed periodically with the results being sent to your email account and/or that the Table of Contents (TOC) of specific journals be e-mailed to you each time a new issue is published.

The names of these services (AutoAlert, SDI, etc.) and the exact procedures for requesting the service vary from vendor to vendor, but the general principle is the same. You specify the search terms or the journal titles and the system will automatically provide you with updated results. For some, you must register with a password and establish a profile or personal account; for others, you simply provide your email address. Some limit the number of search strings you can save. In many of the databases, you can define how often a search is run (daily, weekly, monthly), but others have determined a set frequency. A few of these databases won't run your search automatically, but do allow you to save it to run again at a later time. Because of these differences, we don't have space to include all the directions here. However, each database provides instructions through their "Help" feature. If you have problems or other questions, contact the Reference Desk (refquest@iusb.edu or 237-4441.)

The chart below provides a list of Library databases that have an alert service. All of them can be accessed through our homepage.

<u>Database/Vendor</u>	<u>Auto Subject Search</u>	<u>Table of Contents</u>	<u>Notes</u>
<i>AARP Ageline</i> (OVID)	X		Save Search as AutoAlert (SDI).
<i>ACM Digital Library</i> (Association for Computing Machinery)			Alert Service only available to those with personal subscriptions.
<i>Academic Search Elite</i> (Ebsco)	X		Works only in Advanced Search. Save search history as Alert. Interdisciplinary database.
<i>America: History and Life</i> (ABC-CLIO)	X		CLIO Alert Profile available on first screen in database.
<i>American Chemical Society</i>	X	X	Articles ASAP/TOC Alert available for most journal titles.
<i>Applied Science and Technology Index</i> (SilverPlatter)	X		Save search history as SDI.
<i>Biological Sciences</i> (Cambridge Scientific Abstracts)	X		Search History/Alerts.
<i>Biology Digest</i> (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>Business Source Premier</i> (Ebsco)	X		Works only in Advanced Search. Save search history as Alert.
<i>CANCERLIT</i> (OVID)	X		Save search as AutoAlert (SDI).

<u>Database/Vendor</u>	<u>Auto Subject Search</u>	<u>Table of Contents</u>	<u>Notes</u>
<i>CINAHL (OVID)</i>	X		Save search as AutoAlert (SDI). Nursing and Allied Health.
<i>Conference Papers Index (Cambridge Scientific Abstracts)</i>	X		Save search as Alert. Citations to papers presented at major life science meetings around the world.
<i>Environmental Sciences and Pollution Abstracts (Cambridge Scientific Abstracts)</i>	X		Save search as Alert.
<i>ERIC (Cambridge Scientific Abstracts)</i>	X		Save search as Alert. Educational Resources.
<i>ERIC (Ebsco)</i>	X		Works only in Advanced Search. Save search history as Alert.
<i>General Science Index (SilverPlatter)</i>	X		Save search history as SDI.
<i>Emerald Library</i>	X	X	Save search as Alert. Full text of over 100 journals primarily in management, accounting, education, human resources, and marketing.
<i>Health and Psychosocial Instruments (HAPI) (OVID)</i>	X		Save search as AutoAlert (SDI).
<i>Health Source: Consumer Edition (Ebsco)</i>	X		Works only in Advanced Search. Save search history as Alert.
<i>Health Source: Nursing/Academic Edition (Ebsco)</i>	X		Works only in Advanced Search. Save search history as Alert.
<i>HealthSTAR/Ovid Healthstar (OVID)</i>	X		AutoAlert (SDI).
<i>Historical Abstracts (ABC-CLIO)</i>	X		CLIO Alert Profile available on first screen in database.
<i>Humanities Index (SilverPlatter)</i>	X		Save search history as SDI.
<i>Ingenta</i>	X	X	Establish personal account. Save search as Alert. Indexes over 26,000 publications.
<i>Journals@Ovid Full Text (OVID)</i>	X		Save search as AutoAlert (SDI). Indexes hundreds of scientific, technical, and medical journals.
<i>MLA Bibliography (Modern Language Association) (SilverPlatter)</i>	X		Save search history as SDI. Covers literature, language, linguistics, and folklore.

<u>Database/Vendor</u>	<u>Auto Subject Search</u>	<u>Table of Contents</u>	<u>Notes</u>
<i>MasterFILE Premier</i> (Ebsco)	X		Works only in Advanced Search. Save search history as Alert. Full text for over 1,900 periodicals covering nearly all subjects.
<i>Medline</i> (Cambridge Scientific Abstracts)	X		Search History/Alerts.
<i>Medline (OVID)</i>	X		Save search as AutoAlert (SDI).
<i>Medline</i> (Ebsco)	X		Works only Advanced Search. Save search history as Alert.
<i>Military Library FullTEXT</i> (Ebsco)	X		Works only Advanced Search. Save search history as Alert.
<i>Newspaper Source</i> (Ebsco)	X		Works only Advanced Search. Save search history as Alert.
<i>PAIS International</i> (Public Affairs Information Service) (Cambridge Scientific Abstracts)	X		Save search as Alert. Index to over 400,000 references concerning political, economic, and social issues.
<i>Plant Science</i> (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>Professional Development Collection</i> (Ebsco)	X		Works only in Advanced Search. Save search history as Alert. A highly specialized collection of over 515 full-text journals designed for professional educators.
<i>PsycINFO</i> (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>Regional Business News</i> (Ebsco)	X		Works only in Advanced Search. Save search history as Alert.
<i>Social Service Abstracts</i> (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>Social Work Abstracts</i> (SilverPlatter)	X		Save search history as SDI.
<i>Sociological Abstracts</i> (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>TOXLIN</i> E (Cambridge Scientific Abstracts)	X		Save search as Alert.
<i>Wiley Interscience</i>		X	Establish "Personal Home Page" and activate "content alert" for individual titles. Full-text of over 300 scientific, technical, medical, and professional journals.

Stable URLs: Linking to an article from your course website or Oncourse

Faculty can create links from a course website or Oncourse to full-text articles available from many of the library's subscription databases. Some of these databases allow you to create stable links (sometimes called DOIs or Digital Object Identifiers) to an article simply by using the URL or Web address you get when you retrieve the article. In other databases, including JSTOR, URLs contain search session information that will expire after a period of time so they cannot be used to create stable links. These databases provide methods for generating stable URLs, which can then be used for creating article-level links. Details for creating links to articles in some of our databases follow.

JSTOR

All articles available from JSTOR provide full text. Stable URLs, which differ from the URLs that display when you are viewing an article, are available for all articles. They are provided on search results screens, tables of contents screens, any page of a full-text article, and citation screens. To use the link, click on it, select it and copy and paste as needed.

EBSCOhost

In order to locate a stable URL in EBSCOhost databases, follow these steps:

1. Search the appropriate database for an article. Use *Limit Your Search: Full Text* to limit your search to articles that are available in full text.
2. Once the required article appears in the search results, click "Add" in the right column to add the article to your folder.
3. Click the link "Folder has 1 item" next to the folder icon. From the Delivery options choices, click "Save to disk" link.
4. On the Save Manager screen select the "Links" tab, and click the radio button next to "HTML link(s) to article(s)."
5. Click on the "Save" button. A page is displayed which gives the URL for cutting and pasting, and some instructions for using the link.

ACM Digital Library

When you find the article to which you want to link:

1. Click on the TITLE of the article you want (NOT the "> full text" link).
2. Look for a Digital Object Identifier (DOI) button.
3. Right click on the URL next to the DOI button. Select "Copy Link Location" in Netscape or "Copy shortcut" in Internet Explorer. Copy and paste as needed.

American Chemical Society

When you find the article to which you want to link:

1. Look for a Digital Object Identifier (DOI) button.
2. Right click on the URL next to the DOI button. Select "Copy shortcut" in Internet Explorer or "Copy Link Location" in Netscape. Copy and paste as needed.

Emerald Library

Most URLs created by the Emerald database are dynamic URLs. This means that each time you access an article or any other piece of information stored on the database, the server will create a different URL for that page at that time. These dynamic URLs consist of three specific elements: *Session-specific information*, *Server-specific information*, and *Format-specific information*. These three elements can be removed from the URL for linking purposes, to create a stable URL.

Use the following procedure:

1. Replace the server name with www. The server name will be something like elvira, gottardo, or figaro. Replacing the server-specific portion of the URL with www makes the URL generic.
2. After the .com/ part of the URL, remove all information up until the rpsv/ part of the URL. This is the session-specific part of the URL, which is not required when creating links.
3. Finally, after the page number part of the URL - pxxx where xxx is a number from 0 to 999 - there will sometimes be a .idx followed by some more data. Remove all the data following the pxxx including the .idx. This information is the format-specific information, which is not required when creating links.

Wiley Interscience

Use the DOI under the bibliographic information to create a stable URL. To create a URL from the DOI, append it to the address: <http://dx.doi.org/>. For the DOI number "10.1002/ajhb.10078," the entire URL linking to the article would be: <http://dx.doi.org/10.1002/ajhb.10078>

For additional assistance creating links to articles in these or other databases, contact the reference desk at 237-4441. Note that even if stable links are created, off-campus users will need to login to the proxy server for remote access to the library's resources.
